

# Dexodata

Your trusted business partner in data collection  
Scale your business with ethical proxy solutions

## Dexodata FAQ

### What is Dexodata?

Dexodata is an [innovative proxy infrastructure](#) designed to collect and process web data at scale. All our IP addresses are obtained from ethical sources. We conclude agreements with ASN providers for datacenter IPs, and with ISPs and individuals – for residential and mobile IPs.

**Our aim is to give users a service that meets their professional needs in terms of data – collect it, process it, work with it.**

All types of companies, large and small, choose us as their trustworthy business partner. Thanks to our service, they get access to the big data they need for their business goals. We offer 100% software compatibility, 1M+ ethically gathered proxies, 100% of which suit all marketing purposes. We strongly believe that businesses are more successful when they are not limited by strict frames imposed by websites in terms of [open web data harvesting](#).

## What types of proxies do you provide?

We provide dedicated [Residential, Mobile and Datacenter proxies](#).

All [our proxies are dynamic](#). There are 3 ways to initiate IP rotation:

- Manually with the "Change IP" button on the dashboard.
- By setting the rule for changing external IP with a fixed time interval.
- With every new connection established.

You can use the API GET/POST methods to change the external IP.

## How many proxy addresses do you operate?

Every month we provide access to 1M+ IP addresses in 100+ countries. For every country there are available options to choose a state and ISP. Proxy rotating rule is assigned to a group of proxies or a single IP port in particular.

## How many proxy geolocations do you serve?

Thousands of geo's on the five continents. You are free to select a particular country, city and an internet service provider or a mobile carrier. There are more than a hundred countries, and every state includes more precise geolocations and dozens of local areas to choose from.

## Do you serve real-users IP addresses?

Yes, all [residential and mobile proxies](#) have IP addresses of real end-user devices. IP pools they are in can belong to an Internet Service Provider (ISP) or a Mobile carrier respectively.

## What are your proxies useful for?

Proxies that we operate can be used for gathering public web data of any kind. Our use cases included and not limited to Data scraping, Market research, SEO, Advertisement verification, Retail analytics, SMM, AI training, etc. You can read more in the "Use Cases" section, [in our Blog](#), or feel free to contact our Client Support to ask questions, and make sure Dexodata's proxies fit your professional needs.

## How to get a free proxy trial?

1. One can get a free account replenishment and test any of our proxies until the test sum is expired.
2. The test starts with the first Mb of data transferred through the proxies ordered.
3. There are no limits on trial duration, number of proxies or geolocation.

[Sign up](#) and contact Client Support via messenger or e-mail. You will get instant access to our proxy pools and features.
